

COBALT

MARK OF EXCELLENCE

COBALT TRI-HULL 16

Handsome, sporty lines of the Cobalt 16 complement its finely appointed, Continental styled interior. Superior construction and advanced deep V, tri-hull design provide a truly action-oriented performance.

COBALT TRI-HULL 18

The ultimate in its class. The Cobalt 18 offers a wealth of enviable elegance with a luxurious interior unrivaled in its completeness. And within its beauty is the enduring quality of Cobalt craftsmanship.

Positive Upright Flotation

Both the bottom and the sides are foamed in place with a very high grade foam. The foaming process gives additional strength to the hull. A Cobalt boat will support a full load upright even if the boat should fill with water. This foaming process eliminates most water noise and makes it very quiet riding.

Fiberglass Stringer System

There is no wood to rot or decay in the hull of a Cobalt boat. It has a completely fiberglass grid system including the motor mounts. Stringers and hull are all molded into one rugged, strong unitized structure. It's the finest engineering in the industry.

A. Any of seven engine options offer outstanding performance.

B. Deep V tri-hull design is the reason for Cobalt's exceptional handling characteristics.

C. Cushioned, wrap-around

backrests provide maximum riding comfort in the open bow area.

D. Custom dash panel has the most complete set of standard instruments of any boat made.

E. Continental style seats are enhanced by high

quality Dura-Leather upholstery in bronze, olive green, burgundy, pearl white and turquoise, complemented by color-coordinated carpeting.

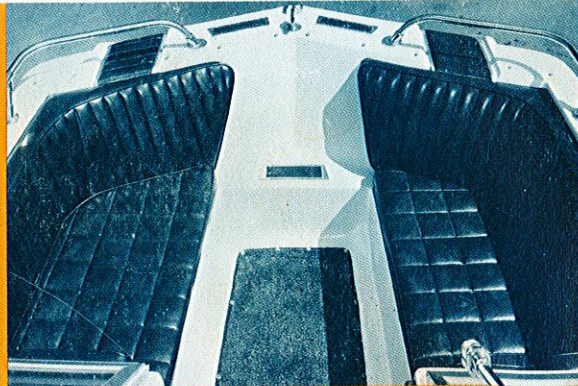

F. Forward storage compartments provide abundant space for

extra boating equipment like ski ropes, lines, anchor, tonneau cover.

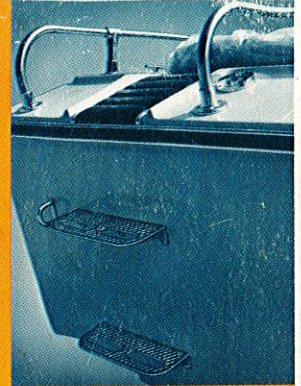

G. Plush, roomy interior layout and lounging seats that adjust fore and aft make Cobalt an ideal family boat.
